### Cocoanuts Make Good Fuel.

"Mine is rather a curious business. said a man who owns a small ware house and shed down near London's docks, "I deal in cocoanut shells, and

from stall keepers all over London, well from confectioners, from cocoanut oil extractors, from market sweepers and others. I won't tell you the usual price. but sometimes I get them for nothing. for carting them away, in fact. I sell them at fourpence a bag, most of my customers being poor people, who mix them, when broken up, with 'slack' coal. But in scores of hotels and large houses a quantity is bought to be mixed with coals as fire lighters, for the immense amount of oil in cocoanut shells makes them take fire at once. Try it and see.

"I have rivals in the business in other parts of London, and some of the makers of patent fire lighters mix large quantities of the shells in their compositions."-London News.

### Rats on Ships.

"Are rats destructive? Well," said a captain of a merchantman, "I once knew them to get through £5,000 worth of stuff in five days.

"Japan does an immense trade with China in cocoons, and the first time I carried such a cargo they were packed in sacks. When we got to Hongkong we found that the rats had discovered that part of a cocoon was good to eat, and the bill for their board came to £5,000. The shipowners were sued for S that amount; but, the packing being considered faulty, the claim was disallowed. It was the first and last cocoon feast the rats had, for ever since Japan has packed cocoons in zinc lined

"Every time a ship gets back to Liverpool a rat catcher is set to clearing out the rats, but by the time we have loaded up again the rodents are every bit as numerous. In some ports we use rat guards on the ropes, and the ship is always fundigated before taking a cargo of fruit or tea. But there is no getting rid of them entirely."-London
